(54) METHOD FOR REPLICATION/UPDATING DATA BASE BETWEEN NETWORKS

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a method for enabling the replication/update of a data base without requiring any special setting for a fire wall.

SOLUTION: A specified protocol in a data base 21 is converted to a protocol which can be accessed over a fire wall 26 by a gateway 31, and transferred through a proxy 33 to a relay sever 35, and the specified protocol of data drawn from the relay server 35 through a proxy 34 is converted to a specified protocol in a data base 22 and replicated/updated.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
